##

1.
One-
Time
Sys-
tem
Setup

Do these steps once when setting up the system for the first time. You will not need to repeat them every month.

1.1 Set Up the Company

1. On the top menu, click **Accounting**.
2. Click **Company**.
3. Click on your company name to open it.
4. Scroll down to the **Accounts** section and fill in:
 - **Default Currency** → type TZS
 - **Default Employee Advance Account** → select or type the account used to track advances (e.g. Employee Advances - HMC). This must be a **Receivable** type account.
 - **Default Cash Account** → select the bank or cash account used to pay advances.
5. Click **Save**.

You are done when the page saves without errors.

1.2 Configure HR Settings

1. Click **HR** on the top menu.
2. Click **Settings**, then **HR Settings**.
3. Fill in the following fields:

Field	What to enter
Calculate Salary Advance Based On	Choose Basic Pay (recommended) or Gross Pay
Salary Advance Eligible Percent	Type 30 (means employees can request up to 30% of their basic pay)
Advance Deduction Salary Component	Type or select Salary Advance Recovery
Salary Advance Require Approval	Tick this checkbox
Advance Cap Basis	Choose Base

4. Click **Save**.

The **Advance Deduction Salary Component** must already exist as a Salary Component before you save. If it does not exist yet, create it first (see Section 2) then come back here.

1.3 Create the Payroll Period

The payroll period tells the system which year's tax slabs to use.

1. Click **Payroll** on the top menu.
2. Click **Payroll Period**.
3. Click **New**.
4. Fill in:
 - **Period Name** → e.g. 2026
 - **Start Date** → 01-01-2026
 - **End Date** → 31-12-2026
 - **Company** → select your company
5. Click **Save**.

Done when saved without errors.

1.4 Create the Income Tax Slab (PAYE)

This tells the system how much PAYE to deduct at each income level.

1. Click **Payroll** → **Income Tax Slab** → **New**.
2. Fill in:
 - **Name** → Tanzania PAYE 2026
 - **Effective From** → 01-01-2026
 - **Currency** → TZS
3. In the **Slabs** table, add one row for each band:

From Amount	To Amount	Percent Deduction
0	270,000	0
270,001	520,000	8
520,001	760,000	20

From Amount	To Amount	Percent Deduction
760,001	1,000,000	25
1,000,001	0 (leave blank = no limit)	30

4. Click **Save**.

Check TRA's website every year to confirm the bands have not changed.

1.5 Verify Chart of Accounts

Make sure these accounts exist. Go to **Accounting → Chart of Accounts** and search for each one. If any is missing, create it.

Account Name	Account Type
Employee Advances	Receivable
PAYE Payable	Payable
NSSF Payable	Payable
NHIF Payable	Payable
WCF Payable	Payable
SDL Payable	Payable
TUICO Payable	Payable
Employee Sales Deductions	Payable
Salary Payable	Payable

2. Creating Salary Components

A Salary Component is one line on a payslip — for example “Basic Pay” or “PAYE”. You must create each component before you can use it in a salary structure.

Path: Payroll → Salary Component → New

Create each component below one at a time. For each one, follow these steps:

1. Click **Payroll → Salary Component → New**.
2. Fill in the fields shown in the table below.
3. In the **Accounts** table at the bottom, click **Add Row** and link the component to the correct GL account.
4. Click **Save**.

2.1 Earning Components

Component Name	Type	Is Tax Applicable	Notes
Basic Pay	Earning	Yes	Base salary — all formulas reference this

Component Name	Type	Is Tax Applicable	Notes
Housing Allowance	Earning	Yes	Usually a % of Basic Pay
Transport Allowance	Earning	No	Per-employee amount set on Employee record
Responsibility Allowance	Earning	Yes	Per-employee amount set on Employee record

2.2 Deduction Components

Component Name	Type	Variable Based on Taxable Salary	Notes
PAYE	Deduction	Yes	Tick this — system computes from tax slab automatically
NSSF Employee	Deduction	No	Formula: gross_pay * contribution_in_percent / 100
NHIF	Deduction	No	Fixed amount per employee — use condition has_nhif == 1
TUICO	Deduction	No	Fixed amount — use condition has_tuico == 1
WCF	Deduction	No	Employer-only — formula: gross_pay * 0.005
Salary Advance Recovery	Deduction	No	Leave amount/formula blank — injected automatically
Employee Sales Deduction	Deduction	No	Leave amount/formula blank — injected via Employee Sale

Important for NSSF, NHIF, TUICO: These do not apply to every employee. You must add a **Condition** on the salary structure row so the system skips employees who are not enrolled. See Section 3 for how to set conditions.

For PAYE: After ticking **Variable Based on Taxable Salary**, a new field **Income Tax Slab** will appear. Select the slab you created in step 1.4.

3. Creating a Salary Structure

A Salary Structure is the template that defines what every employee in a group earns and what is deducted. You create it once and assign it to employees.

1. Click **Payroll** → **Salary Structure** → **New**.
2. Fill in:
 - **Name** → e.g. HMC Monthly
 - **Company** → your company
 - **Payroll Frequency** → Monthly
 - **Currency** → TZS
3. Click **Save** (do not submit yet — add components first).

3.1 Adding Earning Components

In the **Earnings** table, click **Add Row** for each earning:

Component	Amount / Formula	Notes
Basic Pay	base	The word base means it pulls from the Salary Structure Assignment
Housing Allowance	base * 0.30	30% of basic — adjust as needed
Transport Allowance	transport_allowance	Pulls from Employee record field
Responsibility Allowance	responsibility_allowance	Pulls from Employee record field

3.2 Adding Deduction Components

In the **Deductions** table, click **Add Row** for each deduction:

Component	Formula	Condition	Notes
PAYE	<i>(leave blank — auto-computed)</i>	<i>(none)</i>	Tick Variable Based on Taxable Salary on the component
NSSF Employee	gross_pay * (contribution_in_percent or 10) / 100	has_nssf == 1	Only deducted for enrolled employees
NHIF	<i>(fixed amount per grade — enter manually)</i>	has_nhif == 1	Only deducted for enrolled employees
TUICO	<i>(fixed amount)</i>	has_tuico == 1	Only deducted for enrolled employees

Component	Formula	Condition	Notes
WCF	<code>gross_pay * 0.005</code>	<i>(none)</i>	Employer cost — shown on slip for reporting
Salary Advance Recovery	<i>(leave blank)</i>	<i>(none)</i>	Auto-injected when advance is paid
Employee Sales Deduction	<i>(leave blank)</i>	<i>(none)</i>	Auto-injected from Employee Sale

How to enter a Condition: Click the row, then in the **Condition** field type exactly `has_nssf == 1` (for NSSF). The system will only calculate that deduction when the employee's flag is ticked.

4. After adding all rows, click **Save**, then click **Submit**.

The structure is now ready to assign to employees.

4. Setting Up an Employee

Do this for every new employee before their first payroll.

1. Click **HR** → **Employee** → **New**.
2. Fill in the tabs as described below.

4.1 Basic Information Tab

Field	What to enter
First Name / Last Name	Employee's full name
Date of Birth	e.g. 15-03-1990
Gender	Select Male or Female
Date of Joining	First working day
Company	Your company
Status	Active
Employee Number	Staff ID number
Department	Select the department
Designation	Job title

4.2 Salary Tab

Scroll to the **Salary** tab and fill in:

Field	What to enter
Salary Mode	Select Bank for bank transfer
Bank Name	Full name of the bank (e.g. CRDB Bank)

Field	What to enter
Bank Code	Numeric bank code (e.g. 017010 for CRDB). This is used in the advance disbursement file sent to the bank.
Bank A/C No.	Employee's bank account number

Then scroll to **Statutory Benefits** and tick the applicable boxes:

Field	Tick if...
Has NSSF	Employee is registered with NSSF
Has NHIF	Employee has NHIF health insurance
Has TUICO	Employee is a TUICO union member

If **Has NSSF** is ticked, also fill in:

Field	What to enter
Contribution in Percent	Usually 10 (10% of gross)
Has Fixed Contribution	Tick only if this employee pays a fixed amount instead of a percentage
Contribution Fixed Amount	Enter the fixed amount if the above is ticked

Then scroll to **Per-Employee Allowances**:

Field	What to enter
Transport Allowance	Monthly transport amount in TZS. Enter 0 if not applicable.
Responsibility Allowance	Monthly responsibility amount in TZS. Enter 0 if not applicable.

3. Click **Save**.

The employee record is saved. Now assign a salary structure (Section 5).

5. Assigning a Salary Structure to an Employee

Every employee must have a Salary Structure Assignment before payroll can be run for them.

1. Click **Payroll** → **Salary Structure Assignment** → **New**.
2. Fill in:

Field	What to enter
Employee	Search and select the employee
Salary Structure	Select HMC Monthly (or your structure name)
From Date	The date this salary takes effect (usually date of joining)
Base	The employee's monthly basic pay in TZS (e.g. 800000)
Currency	TZS

3. Click **Save**, then click **Submit**.

The **Base** amount is the foundation for all formula calculations. If an employee gets a salary increment, create a **new** Salary Structure Assignment with the new base and a new From Date. Do not edit the old one.

The employee will now appear in payroll runs.

6. Employee Sales Setup

This section covers the one-time setup for recording goods sold to employees (mango, eggs, chicken, etc.) and deducting the cost from their salary.

6.1 One-Time Setup

Step 1 — Create the Salary Component

Follow Section 2 to create a component named Employee Sales Deduction (Deduction type, not tax-applicable). Map it to the Employee Sales Deductions GL account.

Step 2 — Add it to the Salary Structure

Open your salary structure (Payroll → Salary Structure → HMC Monthly).

You cannot edit a submitted salary structure directly. Click **Amend**, make the change, then **Save** and **Submit** the amended version.

In the **Deductions** table, add a row: - **Component:** Employee Sales Deduction - **Formula:** leave blank - **Condition:** leave blank

Click **Save** and **Submit**.

7. Salary Advance Setup

7.1 One-Time Setup Checklist

Work through this list once before the first advance is processed:

- ☐ **Create Salary Advance Recovery salary component** (Section 2 — Deduction type, not tax-applicable, mapped to Employee Advances account)

- ☐ **Set Advance Deduction Salary Component in HR Settings** to Salary Advance Recovery (Section 1.2)
- ☐ **Set Default Employee Advance Account** on the Company (Section 1.1)
- ☐ **Set Default Cash Account** on the Company (Section 1.1)
- ☐ **Set Advance Cap Basis and Percent** in HR Settings (Section 1.2)
- ☐ **Ensure every employee has Bank Code and Bank A/C No.** filled in (Section 4.2)

7.2 Advance Approval Workflow — Who Does What

The system enforces a 4-stage approval before an advance is disbursed:

Stage	Who acts	What they do
Draft	Employee / HR Officer	Creates the advance request
Pending HR Review	HR User	Reviews and clicks Recommend or Reject
Recommended	HR Manager	Approves (sends to Finance) or Rejects
Pending Finance Approval	Accounts User	Clicks Approve & Submit or Rejects
Approved	System	Advance is submitted and ready for payment
Rejected	Employee	Can edit and resubmit

Only the **Accounts User** role can do the final **Approve & Submit**. Make sure the Finance officer has this role assigned in their User settings.

8. Monthly Payroll Workflow

Run these steps every month in this exact order.

Step 1 — Record Employee Sales (Goods Sold)

Do this before generating payroll so the deductions appear on the salary slips.

1. Click **HR → Employee Sale → New**.
2. Fill in:
 - **Company** → your company
 - **Payroll Month** → first day of the current month (e.g. 01-04-2026)
 - **Sales Date** → today's date
 - **Deduction Salary Component** → Employee Sales Deduction
 - **Currency** → TZS
3. In the **Items Sold** table, click **Add Row** for each sale:
 - **Employee** → search and select the employee
 - **Item** → type the item name (e.g. Mango, Eggs, Chicken)

- **Qty** → quantity sold
 - **Unit Price** → price per unit in TZS
 - The **Amount** column fills automatically
4. Add all sales for all employees in this one document.
 5. Click **Save**, review the totals, then click **Submit**.

The system automatically creates one deduction entry per employee. These will appear on their salary slips.

Step 2 — Process Salary Advances

Complete the full advance workflow (Section 9) before generating payroll.

Step 3 — Create the Payroll Entry

1. Click **Payroll** → **Payroll Entry** → **New**.
2. Fill in:

Field	What to enter
Company	Your company
Payroll Frequency	Monthly
Start Date	First day of the month (e.g. 01-04-2026)
End Date	Last day of the month (e.g. 30-04-2026)
Payroll Account	Select Salary Payable
Bank Account	Select the bank account salaries are paid from
Department	Leave blank to include all departments

3. Click **Get Employees**. A list of employees will appear at the bottom.
4. Check the list — every active employee should be there. If someone is missing, check that they have a submitted Salary Structure Assignment.
5. Click **Create Salary Slips**.
6. Wait for the system to finish. A message will confirm how many slips were created.

Step 4 — Review Salary Slips

Before submitting, always check a sample of slips.

1. Click **Payroll** → **Salary Slip**.
2. Filter by the current month and open 3-5 slips at random.
3. For each slip, verify:
 - **Gross Pay** looks correct
 - **PAYE** amount is reasonable (compare against the tax slab)
 - **NSSF** appears only for employees with Has NSSF ticked
 - **NHIF** appears only for employees with Has NHIF ticked
 - **TUICO** appears only for TUICO members

- **Salary Advance Recovery** appears for employees whose advance was paid this month
- **Employee Sales Deduction** appears for employees who purchased goods
- **Net Pay** = Gross Pay minus all deductions

If something looks wrong, do **not** submit. Go back to the Payroll Entry and click **Delete Salary Slips**, fix the issue, then recreate them.

Step 5 — Submit Salary Slips

1. Go back to the Payroll Entry.
2. Click **Submit Salary Slips**.
3. Confirm when prompted.

All slips are now locked. You cannot edit them after this point.

Step 6 — Make the Bank Payment Entry

1. Still in the Payroll Entry, click **Make Bank Entry**.
2. The system creates a Journal Entry that:
 - Debits Salary Payable (clears the liability)
 - Credits the bank account for each employee's net pay
 - Credits PAYE Payable, NSSF Payable, etc.
 - Credits Employee Advances account for advance recovery amounts (this closes the advance)
3. Review the Journal Entry, then click **Submit**.

Step 7 — Pay Statutory Obligations

After the payroll Journal Entry is posted, pay each statutory body and record the payment:

Obligation	Who to pay	Deadline	Journal Entry
PAYE	Tanzania Revenue Authority (TRA)	7th of next month	Dr PAYE Payable / Cr Bank
NSSF (employee + employer)	NSSF	7th of next month	Dr NSSF Payable / Cr Bank
NHIF	NHIF	Monthly	Dr NHIF Payable / Cr Bank
WCF	WCF Board	Monthly	Dr WCF Payable / Cr Bank
SDL	TRA	Monthly	Dr SDL Payable / Cr Bank
TUICO	TUICO	Monthly	Dr TUICO Payable / Cr Bank

To record each payment: **Accounting → Journal Entry → New**, select **Bank Entry**, enter the debit and credit lines, and submit.

9. Salary Advance Monthly Workflow

Run these steps every month before generating payroll (before Step 2 of Section 8).

Step 1 — Employee Creates the Advance Request

1. Click **HR → Employee Advance → New**.
2. Fill in:
 - **Employee** → search and select your name (or the employee's name if HR is entering it)
 - The system automatically fills:
 - **Eligible Amount** — the maximum the employee can request (e.g. 30% of basic pay)
 - **Advance Amount** — pre-filled from Eligible Amount (you can reduce it but not exceed it)
 - **Payroll Month** — set to the first day of the current month
3. Confirm the **Payroll Month** is correct.
4. Click **Save**.
5. Click **Submit for Review**.

The system will block a second advance if one already exists for this employee in the same payroll month.

Step 2 — HR User Reviews

1. The HR User opens the advance from their **Notifications** or by going to **HR → Employee Advance** and filtering by **Workflow State = Pending HR Review**.
 2. Open the advance and check the amount is within policy.
 3. Click **Recommend** to send it to the HR Manager, or **Reject** to send it back.
-

Step 3 — HR Manager Approves

1. The HR Manager opens advances with **Workflow State = Recommended**.
 2. Reviews and clicks **Approve** (sends to Finance) or **Reject**.
-

Step 4 — Finance Does Final Approval

1. The Accounts User opens advances with **Workflow State = Pending Finance Approval**.

2. Confirms the amount is available.
3. Clicks **Approve & Submit**.

The advance is now submitted and ready for payment.

Step 5 — Generate the Disbursement Report

This report produces the file you send to the bank for bulk transfer.

1. Click **HR → Reports → Employee Advance Disbursement**.
 2. Set the filters:
 - **Payroll Month** → first day of the current month (e.g. 01-04-2026)
 - **Company** → your company
 - **Reference** → the system auto-fills this as e.g. HMC SALARY ADVANCE APRIL 2026. Edit if needed.
 3. Click **Run**.
 4. The report shows one row per employee with their name, bank code, bank account number, and amount.
 5. Click the **Export** button (top right) → choose **Excel** or **CSV**.
 6. Send the exported file to the bank.
-

Step 6 — Mark Advances as Paid (After Bank Confirms)

After the bank confirms the transfers have been made:

1. Click **HR → Employee Advance**.
2. In the list view, use the filters to show:
 - **Status** = Unpaid
 - **Payroll Month** = current month
3. Tick the checkbox at the top of the list to select all rows.
4. Click **Actions → Mark as Paid**.
5. In the dialog that appears:
 - **Mode of Payment** → select Bank Transfer or your mode
 - **Bank Account** → select the account used (or leave blank to use the company default)
6. Click **Create Payment Entry**.

The system:

- Creates one Payment Entry covering all selected advances
 - Changes each advance status to **Paid**
 - Automatically creates a **Salary Advance Recovery** deduction entry for each advance, dated to the Payroll Month
-

Step 7 — Verify the Deduction Entries Were Created

1. Click **Payroll → Additional Salary**.
2. Filter by:

- **Salary Component** = Salary Advance Recovery
- **Payroll Date** = current month

3. Confirm one entry exists for each employee whose advance was paid.

These entries will automatically appear as deductions on the salary slips when payroll is run.

10. Employee Sales Monthly Workflow

This is covered in Section 8 Step 1. As a reminder, the monthly process is:

1. At the end of each month, collect the sales records from the store (who bought what and how much).
2. Create one **Employee Sale** document for the whole month (HR → Employee Sale → New).
3. Add every sale as a row in the Items table.
4. Submit the document.
5. The system creates one deduction entry per employee automatically.
6. When payroll is run, the deduction appears on each employee's salary slip.

Submit the Employee Sale document **before** creating salary slips. If you submit it after, the deduction will not appear on the slips for that month.

11. Running Statutory Reports

Use these reports to prepare your monthly statutory filings. Run them after salary slips are submitted.

Path for all reports: Payroll → Reports → (*report name*)

11.1 PAYE Report

Report name: Tanzania PAYE Report

1. Click **Payroll** → scroll to **Reports** → click **Tanzania PAYE Report**.
 2. Set filters:
 - **Payroll Month** → first day of the month
 - **Company** → your company
 - **PAYE Salary Component** → PAYE
 3. Click **Run**.
 4. The report shows each employee's gross pay and PAYE deducted.
 5. The **Total PAYE** in the summary bar is the amount to pay TRA.
 6. Click **Export** → **Excel** to download for your records.
-

11.2 NSSF Report

Report name: Tanzania NSSF Report

1. Set filters: Payroll Month, Company, **NSSF Employee Component** = NSSF Employee.
 2. Click **Run**.
 3. The report shows only employees with **Has NSSF** ticked.
 4. Each row shows the employee contribution, employer contribution (equal amount), and total.
 5. The **Rate/Fixed** column shows whether the employee pays a percentage or a fixed amount.
 6. The summary bar shows **Total NSSF Payable** (employee + employer combined) — this is what you pay to NSSF.
-

11.3 NHIF Report

Report name: Tanzania NHIF Report

1. Set filters: Payroll Month, Company, **NHIF Salary Component** = NHIF.
 2. Click **Run**.
 3. Only employees with **Has NHIF** ticked appear.
 4. Export and use the total to pay NHIF.
-

11.4 TUICO Report

Report name: Tanzania TUICO Report

1. Set filters: Payroll Month, Company, **TUICO Salary Component** = TUICO.
 2. Click **Run**.
 3. Only TUICO members appear.
 4. Export and use the total to pay TUICO.
-

11.5 WCF Report

Report name: Tanzania WCF Report

1. Set filters: Payroll Month, Company.
 2. The **WCF Rate (%)** defaults to 0.5 — change only if the rate has changed.
 3. Click **Run**.
 4. The summary shows **Total WCF Payable** — employer-only contribution.
-

11.6 SDL Report

Report name: Tanzania SDL Report

1. Set filters: Payroll Month, Company.

2. The **SDL Rate (%)** defaults to 4.5 — change only if TRA has updated the rate.
3. Click **Run**.
4. The summary shows **Total SDL Payable** — employer-only contribution.

12. Shift Management

12.1 Setting an Employee's Shift

1. Click **HR → Shift Assignment → New**.
2. Fill in:
 - **Employee** → select the employee
 - **Shift Type** → select the shift (e.g. Morning, Night)
 - **Start Date** → when the shift starts
 - **End Date** → when the shift ends (leave blank for indefinite)
3. Click **Save** and **Submit**.

12.2 Marking an Employee as “Stay in Current Shift”

If an employee should never be moved during a shift swap:

1. Open the employee record (HR → Employee → search by name).
2. Go to the **Shift** tab.
3. Tick **Stay In Current Shift**.
4. Click **Save**.

This employee will be excluded from swaps but will still receive a new shift assignment in their original shift when a swap is processed.

12.3 Swapping Shifts Between Two Groups

Use this when you want to rotate two groups of employees between two shifts.

1. Click **HR → Swap Shift → New**.
2. Fill in:

Field	What to enter
Shift A	First shift type (e.g. Morning)
From Date / To Date	The date range to look at who is currently assigned
Shift B	Second shift type (e.g. Night)
New Assignment From Date	Start of the new assignment period
New Assignment To Date	End of the new assignment period
Respect Stay	Tick this to protect employees with “Stay In Current Shift”
Cancel Existing	Tick this to remove old overlapping assignments

3. Click **Preview** — a table shows which employees will be swapped and which will stay. Review carefully.

4. If the preview looks correct, click **Submit**.

The system creates new shift assignments for all employees in the new date range. Employees marked “Stay” keep their original shift.

13. Cancelling or Correcting a Mistake

13.1 Cancelling a Salary Slip

You can only cancel a salary slip if the Payroll Entry has not yet been submitted.

1. Open the salary slip (Payroll → Salary Slip → search by employee name).
2. Click **Cancel**.
3. Fix the issue (e.g. update the employee record or salary structure).
4. Go back to the Payroll Entry and recreate the slip.

13.2 Cancelling a Submitted Payroll Entry

1. Open the Payroll Entry.
2. Click **Cancel**.
3. This also cancels all linked salary slips and the Journal Entry.
4. Fix the issue and rerun from Step 3 of Section 8.

13.3 Cancelling an Employee Advance

1. Open the Employee Advance.
2. Click **Cancel**.
3. The system will also cancel the linked Payment Entry and the Salary Advance Recovery deduction entry.
4. If the advance was already deducted from payroll, you will need to manually cancel the Additional Salary entry as well.

13.4 Cancelling an Employee Sale

1. Open the Employee Sale document.
2. Click **Cancel**.
3. The system automatically cancels all linked Additional Salary (Employee Sales Deduction) entries.
4. If payroll has already been run, you will need to cancel and redo the salary slips.

Always cancel in reverse order: cancel the latest document first. For example, cancel the Payroll Entry before cancelling a Salary Structure Assignment.

14. Quick Reference — Monthly Checklist

Use this checklist every month. Tick each item as you complete it.

Before Running Payroll

- ☐ Collect store sales records for the month
- ☐ Create and submit **Employee Sale** document for all goods sold
- ☐ Collect advance requests from employees
- ☐ Create **Employee Advance** records and route through approval workflow
- ☐ Finance does **Approve & Submit** on all approved advances
- ☐ Run **Employee Advance Disbursement** report and send to bank
- ☐ After bank confirms, select all Unpaid advances → **Actions** → **Mark as Paid**
- ☐ Verify **Additional Salary** (Salary Advance Recovery) entries were auto-created

Running Payroll

- ☐ Click **Payroll Entry** → **New** and fill in the month dates
- ☐ Click **Get Employees** — verify all active employees appear
- ☐ Click **Create Salary Slips**
- ☐ Open 3-5 random slips and verify earnings, deductions, and net pay
- ☐ Click **Submit Salary Slips**
- ☐ Click **Make Bank Entry** and submit the Journal Entry

After Payroll

- ☐ Run **Tanzania PAYE Report** — note total, pay TRA by 7th
- ☐ Run **Tanzania NSSF Report** — note total (employee + employer), pay NSSF by 7th
- ☐ Run **Tanzania NHIF Report** — pay NHIF
- ☐ Run **Tanzania TUICO Report** — pay TUICO
- ☐ Run **Tanzania WCF Report** — pay WCF Board
- ☐ Run **Tanzania SDL Report** — pay TRA (SDL)
- ☐ Post Journal Entries for each statutory payment
- ☐ File returns with TRA, NSSF, NHIF as required

Last updated: April 2026
